Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

SAYS

- "I want to know if I really understand this concept."
- "I wish I could receive instant feedback on my spoken explanations."
- "Preparing for technical interviews is difficult."
- "I want an easier way to practice concepts."

THINKS

- "Is my explanation conceptually correct?"
- "Am I missing important technical points?"
- "Will I perform well during viva or interviews?"
- "How can I improve my conceptual understanding?"

Persona Name:

Rahul Kumar [Computer Science Student]

DOES

- Studies computer science subjects regularly.
- Practices explaining concepts aloud.
- Watches online tutorials and educational videos.
- Takes mock interviews and self-assessment tests.

FEELS

- Nervous before viva examinations and interviews.
- Frustrated when feedback is delayed or unavailable.
- Confused about whether concepts are fully understood.
- Confident and motivated after receiving constructive AI feedback.
